## THE SIZE OF AN ATOM

- **\_ 16.** Which of the following statements is true?
  - **a.** A penny has about 20,000 atoms.
  - **b.** A penny has more atoms than Earth has people.
  - **c.** Aluminum is made up of large-sized atoms.
  - **d.** Aluminum atoms have a diameter of about 3 cm.
- 17. One of the tools that scientists now use to observe atoms is

the \_scanning tunneling electron microscope
